

# Quick Start Guide

**Turbo HD series DVR**  
DS-72xxHGHI-SH  
DS-73xxHQHI-SH

**Note: For more information refer to the complete User Manual located on the CD-ROM**

## OVERVIEW

1. Overview
2. Main Menu Layout
3. Formatting the HDD
4. Setting up Time/Date
5. Setting up The Network
6. Adding IP cameras
7. Setting up Recording
8. Configuring the Mobile APP
9. Playing Back Recorded Video
10. Making a Backup

**Please connect a monitor and a USB mouse (supplied) to the DVR for configuration purposes**

## 1. OVERVIEW

### WHAT'S IN THE BOX

#### THE BOX CONTAINS:

DVR

USB Mouse

IR Remote  
(Batteries not included)

Power Cord

Hard Drive Mounting  
screws and brackets

Hard Drive  
(Preinstalled)

Hard Drive Cables

Rack Mount Ears  
(not included in 4-  
ch model box)

Quick Start Guide

Manual/Software CD

Please note, that the Quick Start Guide is compiled for the latest firmware versions. Please upgrade the firmware of the DVR to the latest version before proceeding. Also note, that the CD may contain outdated manuals and software.

For latest firmware, manual and software downloads please visit:

[www.hikvision.com/en/us/download.asp](http://www.hikvision.com/en/us/download.asp)

## FRONT AND REAR VIEW

4. Direction/Enter Keys
5. Power
6. Jog Shuttle Control
7. USB Interface
8. IR Receiver

## 2. MAIN MENU LAYOUT

### MAIN MENU LAYOUT

DEFAULT USERNAME: **admin**    DEFAULT PASSWORD: **12345**  
(Please note, that the username and password are case sensitive)

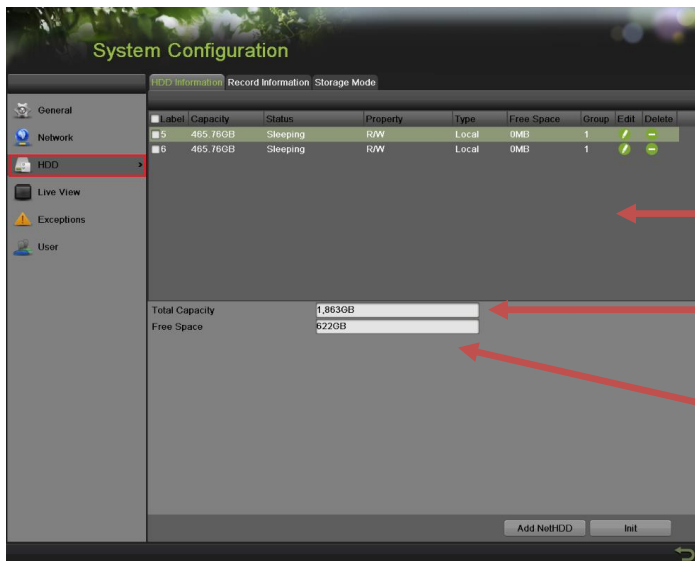

## 3. FORMATTING THE HARD DRIVE

### FORMATTING THE HARD DRIVE

If the Hard Drive (HDD) is not formatted (initialized), the DVR will begin to beep. The beeping will continue until the HDD is formatted. To format the HDD, go to:

“MENU” > “SYSTEM CONFIGURATION” > “HDD”

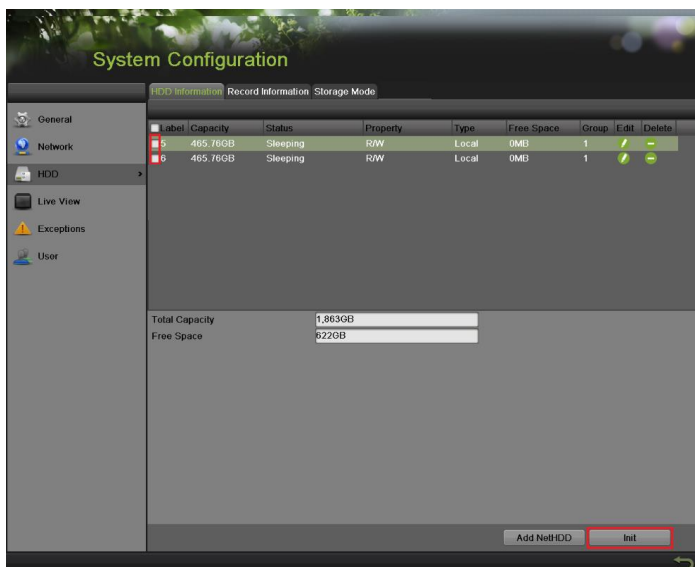

Select the HDDs that need to be formatted, and press “INIT”

List of HDDs

Total HDD Space

Free Space

#### Please Note:

**Units purchased with HDDs, already come with formatted HDDs**

**Formatting the HDDs also erases the recorded video from the HDDs (this does not affect the settings).**

## 4. SETING UP DATE/TIME

### DATE AND TIME SETUP

To setup the Time and Date on a DVR, please go to:

“MENU” > “SYSTEM CONFIGURATION” > “GENERAL”

The screenshot displays the 'System Configuration' interface with the 'General' tab selected. The 'Time/Date' section is active, showing the following settings:

- Date Format: YYYY-MM-DD
- System Date: 2014-07-18
- System Time: 15:40:03
- Time Zone: (GMT-08:00) Pacific Time ( )
- Enable DST:  Customize
- Enable NTP:
- Interval (min): 0
- NTP Server: [Empty field]
- NTP Port: 0

Red arrows point from three callout boxes to specific settings:

- NTP Settings** points to the 'Enable NTP' checkbox and the 'Interval (min)', 'NTP Server', and 'NTP Port' fields.
- Time Zone and Daylight Savings Time settings** points to the 'Time Zone' dropdown and the 'Enable DST' checkbox.
- Date and Time settings** points to the 'Date Format', 'System Date', and 'System Time' fields.

An 'Apply' button is located at the bottom right of the configuration area.

## 5. SETTING UP THE NETWORK

### SETTING UP NETWORK ACCESS

Networking a DVR requires 3 steps:

1. Assign an **IP address, Default Gateway, Subnet Mask, and a DNS server (Please note: DNS, not DDNS)** to the DVR
2. Forward the appropriate ports on the router (**Port Forwarding**).
3. Register **DDNS** (DDNS registration is required only if the public IP address is Dynamic).

To assigning an **IP ADDRESS**, go to “MENU”>”SYSTEM CONFIGURATION”>”NETWORK”

The screenshot shows the 'System Configuration' interface with the 'Network' tab selected. The 'General' sub-tab is active, showing various network settings. Red boxes and arrows highlight key elements: 'General' in the top left, 'NIC Type' in the dropdown menu, 'Enable DHCP' checkbox, and the 'IPv4 Address' field. A callout box on the right explains that enabling DHCP allows the router to assign an IP address. A bottom callout box notes the default IP address.

Field	Value
NIC Type	10M/100M/1000M Self-ada
Enable DHCP	<input type="checkbox"/>
IPv4 Address	192.0.0.64
IPv4 Subnet Mask	255.255.255.0
IPv4 Default Gateway	
MTU(Bytes)	1500
MAC Address	00:40:48:bf:e3:2d
Preferred DNS Server	
Alternate DNS Server	

**General**

**Select NIC Type**

**Enable DHCP**

With DHCP enabled, the router will assign an IP address to the DVR

**IP CONFIGURATION**

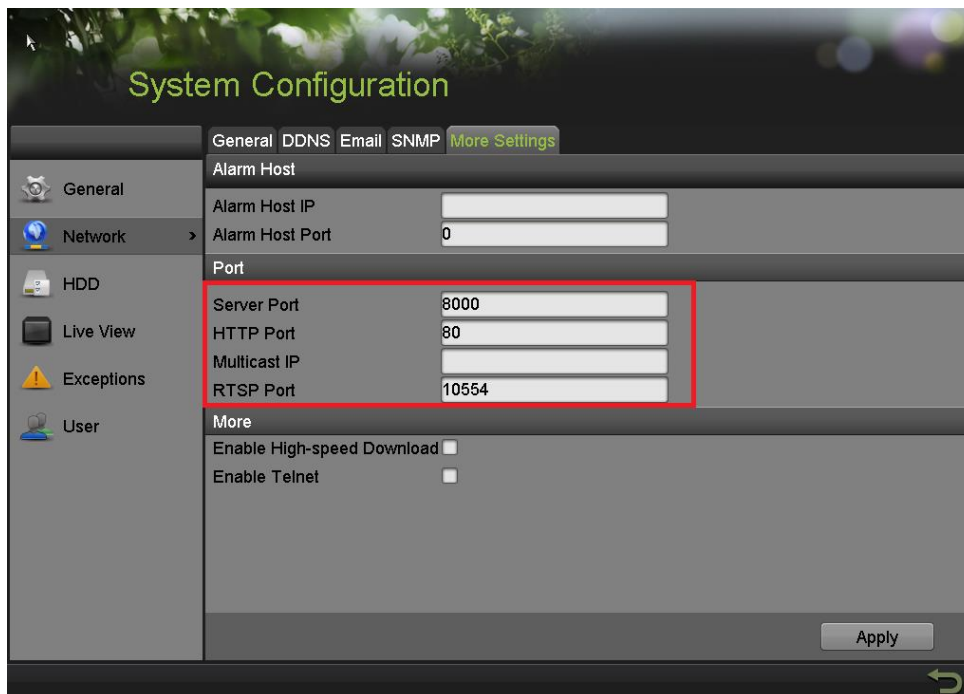

- Please note that the DVR have a default IP Address set to **192.0.0.64**

## SETTING UP NETWORK ACCESS

After assigning the IP information, click on the “**MORE SETTINGS**” tab

The “**MORE SETTINGS**” tab contains the ports that need to be forwarded for remote access

The **SERVER PORT** is responsible for the **MOBILE APP** and **CLIENT SOFTWARE** log-in.  
The **HTTP PORT** is responsible for **WEB BROWSER** log-in.  
The **RTSP PORT** is responsible for **VIDEO/AUDIO STREAMING**.

Units with older firmware have the **RTSP PORT** set to **554**. A lot of cell phone carriers block incoming data through port **554**, which is why Hikvision recommends changing that port to **10554**

## SETTING UP NETWORK ACCESS

The **HTTP PORT** and the **SERVER PORT** can be changed if desired, in order to avoid conflicts with the **ISP** or the existing network configuration.

### PORT FORWARDING

After assigning the IP information to the DVR, connect a computer to the same router that the DVR is connected to (wired connection is recommended, to avoid complications). Log into the **ROUTER**, and proceed with **PORT FORWARDING**.

For **PORT FORWARDING** assistance contact the Internet Service Provider (**ISP**), or the router manufacturer. Also refer to [www.portforward.com](http://www.portforward.com) for port forwarding step by step instructions. Please be aware, that Hikvision USA is not associated with [www.portforward.com](http://www.portforward.com), and not responsible for any activity between the user and [www.portforward.com](http://www.portforward.com). Please refrain from downloading any software from the abovementioned website.

Proceed to the “**ROUTERS**” section for step by step instructions.

### DDNS SETUP

DDNS registration has been made more user friendly, and takes only a few seconds to complete. The legacy units require user registration on [www.hik-online.com](http://www.hik-online.com). This step is no longer needed.

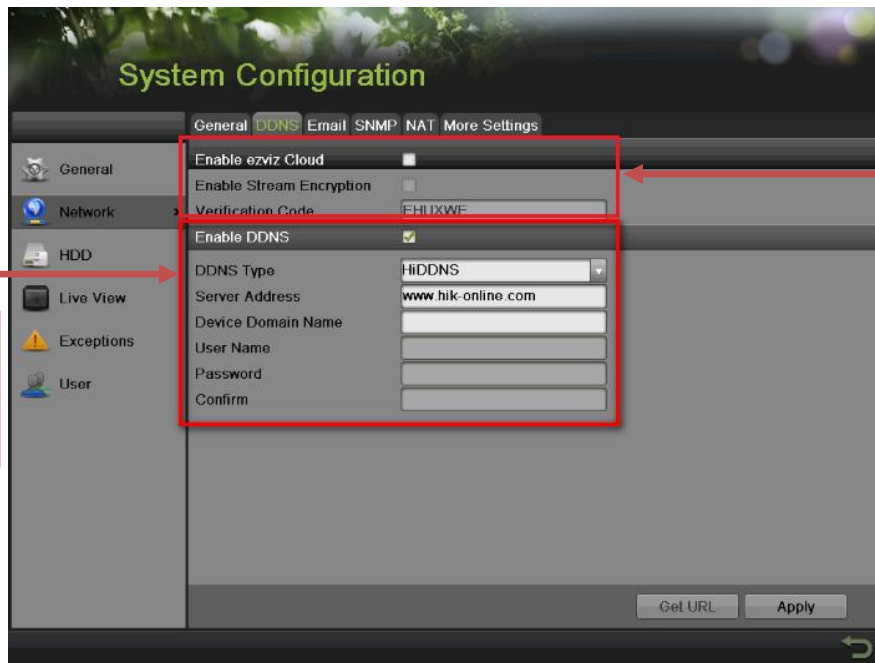

Click on the DDNS tab

In the **DDNS** tab:

- a. Enable DDNS
- b. Change the **DDNS TYPE** to **HiDDNS** (in some cases **HkDDNS**)
- c. Make sure that the **SERVER ADDRESS** is set to [www.hik-online.com](http://www.hik-online.com)
- d. Create a **DEVICE DOMAIN NAME** (the domain name **CANNOT** contain **spaces, special characters and/or upper case letters**)

## SETTING UP NETWORK ACCESS

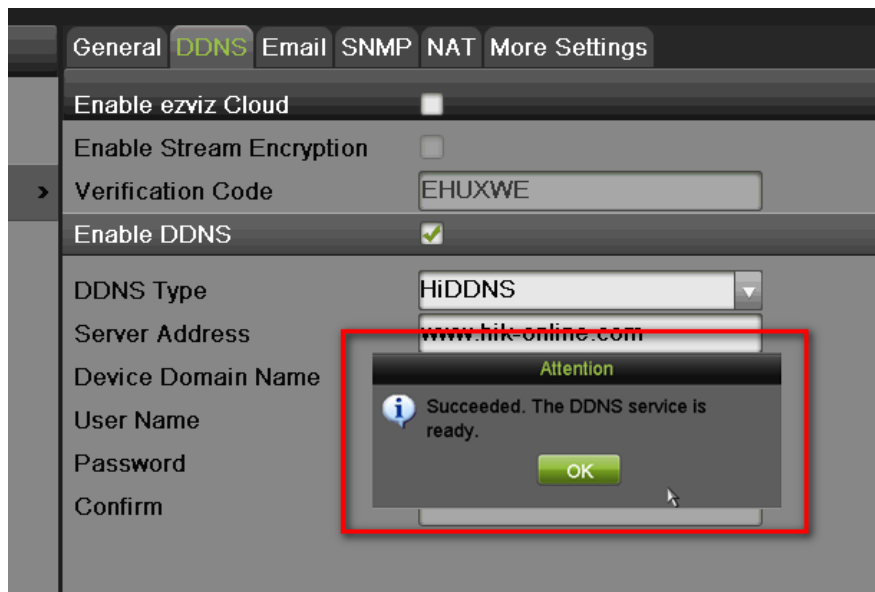

Enable DDNS and  
create a DOMAIN  
NAME

EZVIZ is used for a  
connection through a  
secure server.  
In this case port  
forwarding is not  
required.

**Please contact  
Technical Support  
for detailed  
information**

After the changes have been made, presses “APPLY”. A “SUCCESS” message will pop up

If the Domain Name does not meet the acceptable criteria, and/or is already registered, an error message will appear (The domain name cannot contain upper case characters, spaces, special characters...).

## 6. ADDING IP CAMERAS

### ADDING IP CAMERAS

Go to:

“MENU”>”CAMERAS SETUP”

**Cameras Setup**

IP Camera Import/Export

Cam...	Add/Do...	Status	IP Camera A...	Edit	Up...	Camera Name	Protocol	Device Model	Manag...	Serial No.
D1			10.18.0.199			IPdome	HIKVISION	DS-2DF1-572	8000	DS-2DF1...
	+		10.18.0.202				HIKVISION	DS-6716HWI-SATA	8180	4134812...
	+		10.18.0.166				HIKVISION	DS-6716IFI	8000	4623635...
	+		10.18.0.203				HIKVISION	DS-2CD4312F-IZ	8189	4719116...
	+		10.18.0.191				HIKVISION	IDS-2CD6024FW...	8000	4727802...
	+		10.18.0.206				HIKVISION	DS-2CD4024F	8104	4192206...
	+		10.18.0.208				HIKVISION	DS-6704IWI	8103	4191245...
	+		10.18.0.209				HIKVISION	DS-2CD4132FWD-I8000	8100	4190800...
	+		10.18.0.22				HIKVISION	IP Dome	8000	4152673...
	+		10.18.0.201				HIKVISION	DS-2DF7184-A	8000	4427193...

Refresh Upgrade Delete Add All Custom Adding

IPC Status: Connected Connected and Support Previ... Not Connect...

Press the “GARBAGE CAN” icon to delete an added camera

Press “+” to add the camera to the DVR

Press “EDIT” to change the camera’s IP address.

Please refer to the manual for detailed information

“REFRESH” to find cameras connected to the network

List of detected cameras (YELLOW)

List of added cameras (WHITE)

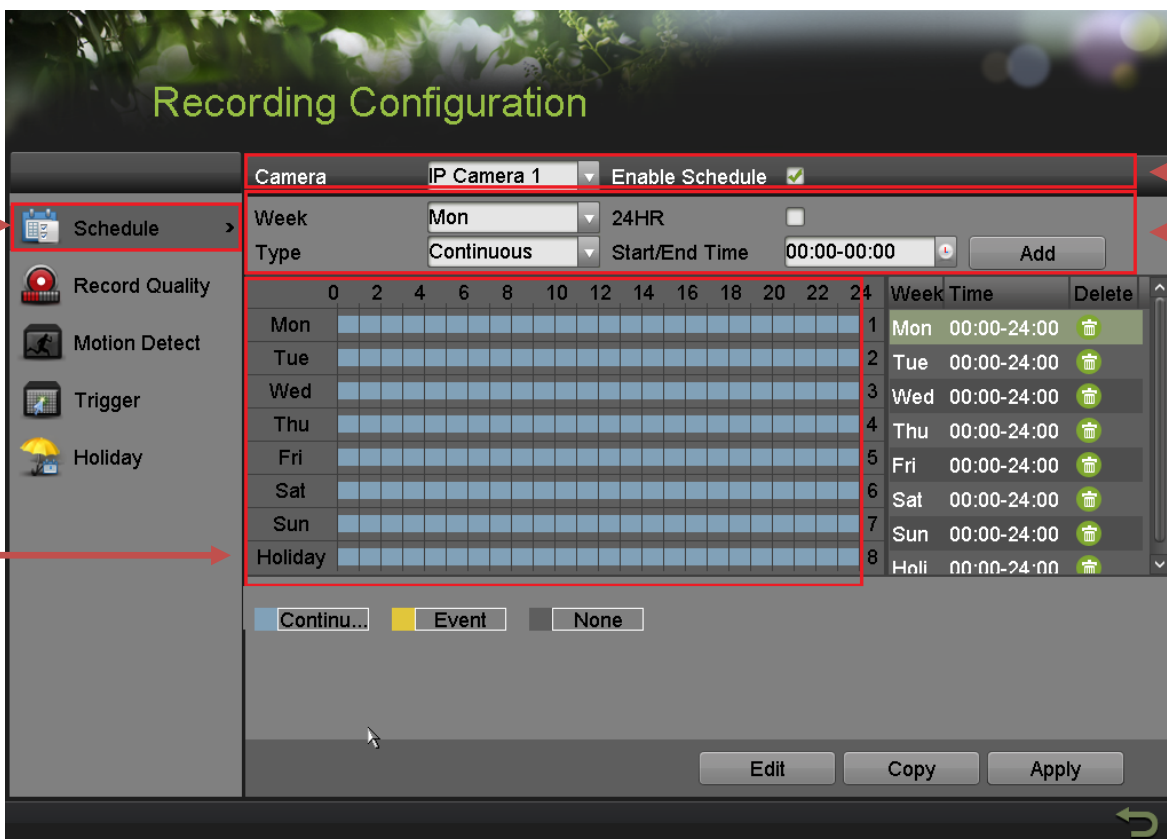

- Please note: To change the CAMERA NAME go to OSD

## 7. SETTING UP RECORDING

### SETTING UP RECORDING

Hikvision DVRs are defaulted to **CONTINUOUS RECORDING**.

Please go to: “MENU”>”RECORDING CONFIGURATION”

Setup Recording Schedule  
(Continuous/Motion)

The color of the calendar is what constitutes the recording schedule:

1. **Blue=Continuous**
2. **Yellow=Event (Motion/Alarm)**
3. **Grey= No Recording**

This field is used to customize a part of the existing schedule  
**This can be ignored if setting up motion only recording**

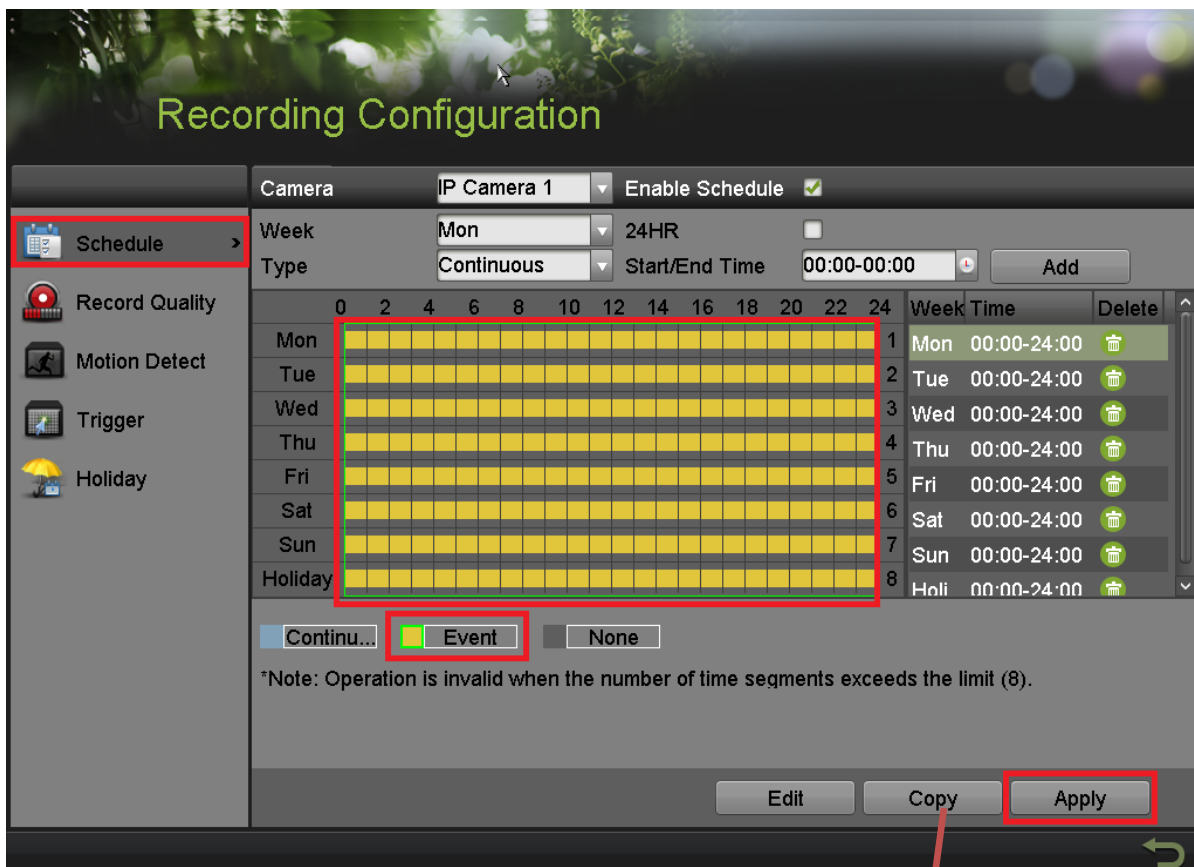

- **Please note:** If **ENABLE SCHEDULE** is not checked, then that camera would not be recording

Select the camera.  
Enable/Disable the schedule

## SETTING UP RECORDING

To set the DVR to **MOTION RECORDING**, go to:

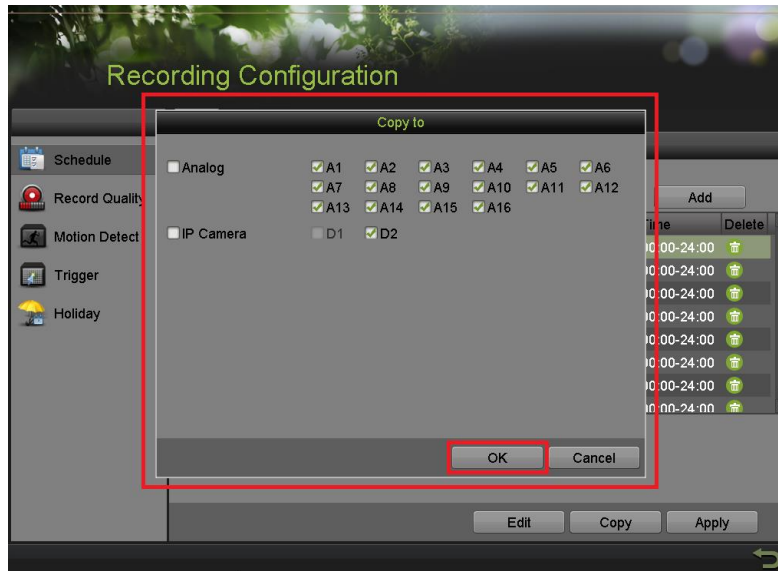

1. “MENU”>”RECORDING CONFIGURATION”
2. Click on the “**EVENT**” under the calendar (yellow). After this the mouse cursor will change to a **WAND**.
3. Select the calendar, and it will turn **YELLOW** (just like on a computer, click on the top-left corner of the calendar and drag to the bottom-right corner).
4. Press **APPLY**.

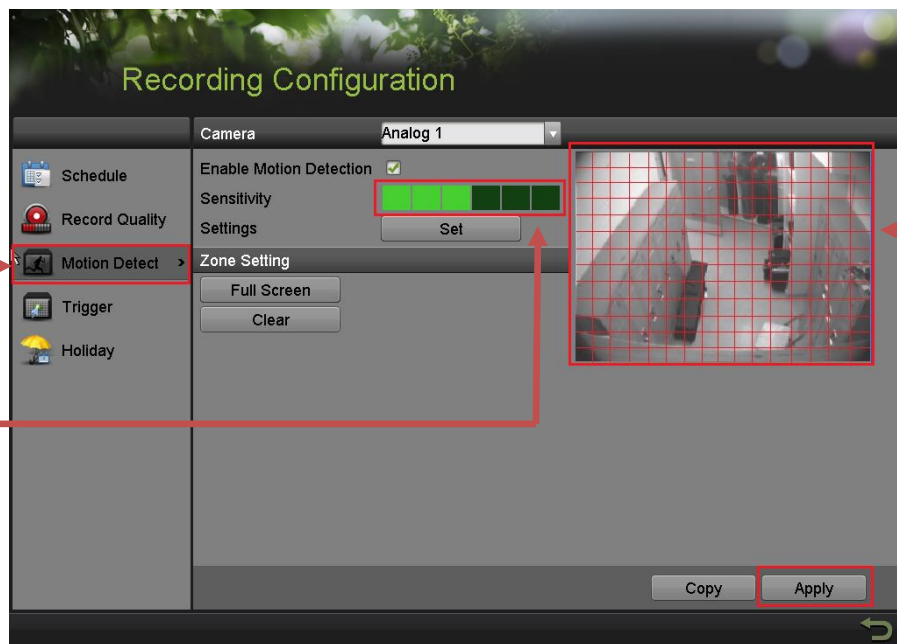

5. Press **COPY** to copy the new schedule to the remaining cameras.

## SETTING UP RECORDING

After the recording has been set to “EVENT RECORDING” go to “MOTION DETECT” to set the motion detection for every camera. In this step, the “COPY” option is available only for analog cameras, the IP cameras need to be configured individually.

**Motion Detection Setup**

**Motion Sensitivity**  
The amount of bright green squares indicates the sensitivity level. (in this picture the sensitivity is set to 3)

**Motion Area**  
The grid indicates the area, where motion will be detected

## SETTING UP RECORDING

To set the recording **RESOLUTION/FRAMERATE/BITRATE** settings, please go to:

”**RECORD QUALITY**” in the “**RECORDING CONFIGURATION**” submenu

The screenshot shows the 'Recording Configuration' window with the 'Main Stream' tab selected. The interface includes a left sidebar with options like 'Schedule', 'Record Quality', 'Motion Detect', 'Trigger', and 'Holiday'. The main area is divided into 'Continuous' and 'Event' recording modes. The 'Continuous' mode is selected, and its settings are shown in a table below. The 'Event' mode settings are also visible for comparison. Callouts point to the 'Main Stream' tab, the 'Record Quality' menu item, the 'Camera' dropdown (set to 'Camera 01(A1)'), the 'Continuous' and 'Event' mode sections, and the 'Main Stream' dropdown under 'Video Stream'.

Setting	Continuous	Event
Recording Mode	Continuous	Event
Stream Type	Video & Audio	Video & Audio
Resolution	1280*720(HD720P)	1280*720(HD720P)
Bitrate Type	Variable	Variable
Video Quality	Full Frame	Full Frame
Frame Rate	General	General
Max. Bitrate Mode	2048	2048
Max. Bitrate(Kbps)	3072(Kbps)	3072(Kbps)
Max. Bitrate Recommended	<input checked="" type="checkbox"/>	
Record Audio	<input checked="" type="checkbox"/>	
Video Stream	Main Stream	
Input Resolution	NO VIDEO	
Recording Time (days)	0	

**Select Main Stream**

**Record Quality**

**Select Camera**

**Continuous**  
Pertains to live view image as well as continuous recording

**Event**  
Pertains to event recording only (Motion or alarm)

## SETTING UP RECORDING

**Stream Type** allows enable/disable the audio streaming from the cameras (if the camera does not have audio capabilities, then the **Stream Type** will only have **Video** option)

**Resolution** allows setting of the recording resolution

**Bitrate Type** allows the DVR to save HDD space when set to **Variable** (Available choices: **Variable** and **Constant**)

**Video Quality** adjusts picture clarity (**medium setting (3 green squares)** is recommended. Medium setting is the balance between good picture and saving HDD space).

**Frame Rate** allows setting of the recording frame rate (**12-15 fps** is recommended to save HDD space and not to have a “choppy” image)

**Max Bitrate Mode** allows choosing between preset bitrate values and customizing the values (**General** setting is recommended)

**Max Bitrate (KBPS)** is the chosen bitrate for streaming the video

**Max Bitrate Recommended** is the DVR’s recommended bitrate according to the parameters set above.

**Record Audio** allows turning the audio recording on or off (for IPC, this option is only available if the camera has a microphone connected to it)

**Video Stream** allows changing the recording stream between **Main Stream** and **Sub Stream** (this step requires a restart).

**Input Resolution** shows the resolution of video stream from camera.

**Recording Time(days)** shows how much time left for recording, based on current HDD volume and recording parameters.

Please refer to the table below for recommended recording parameters

Resolution	Video Quality	Frame Rate (FPS)	Bitrate (KBPS)
320x240 (QVGA)	Medium (3 squares)	12-15	207
352x240 (CIF)	Medium (3 squares)	12-15	384
640x480 (VGA)	Medium (3 squares)	12-15	768
704x480 (4CIF)	Medium (3 squares)	12-15	1024
1280x720 (720P)	Medium (3 squares)	12-15	2048
1280x960 (960P)	Medium (3 squares)	12-15	2048
1600x1200 (2MP)	Medium (3 squares)	12-15	2560
1920x1080 (1080P)	Medium (3 squares)	12-15	3072

## SETTING UP RECORDING

Last step in the recording setup is setting up the **Sub Stream**.

The **Sub Stream** is used for streaming on mobile devices, as well as displaying multiple cameras on the local output

Select  
Sub  
Stream

Record  
Quality

The screenshot displays the 'Recording Configuration' window with the 'Substream' tab selected. The interface includes a left sidebar with options like Schedule, Record Quality, Motion Detect, Trigger, and Holiday. The main area shows configuration for 'IP Camera 1' with the following settings:

Parameter	Value
Camera	IP Camera 1
Stream Type	Video & Audio
Resolution	352*240(CIF)
Bitrate Type	Variable
Video Quality	Progressive
Frame Rate	Full Frame
Max. Bitrate Mode	General
Max. Bitrate(Kbps)	512
Max. Bitrate Recommended	512(Kbps)

Buttons for 'Copy' and 'Apply' are visible at the bottom right of the configuration area.

Unlike Main Stream,  
**Sub Stream** can only go up to 4CIF

Select  
Camera

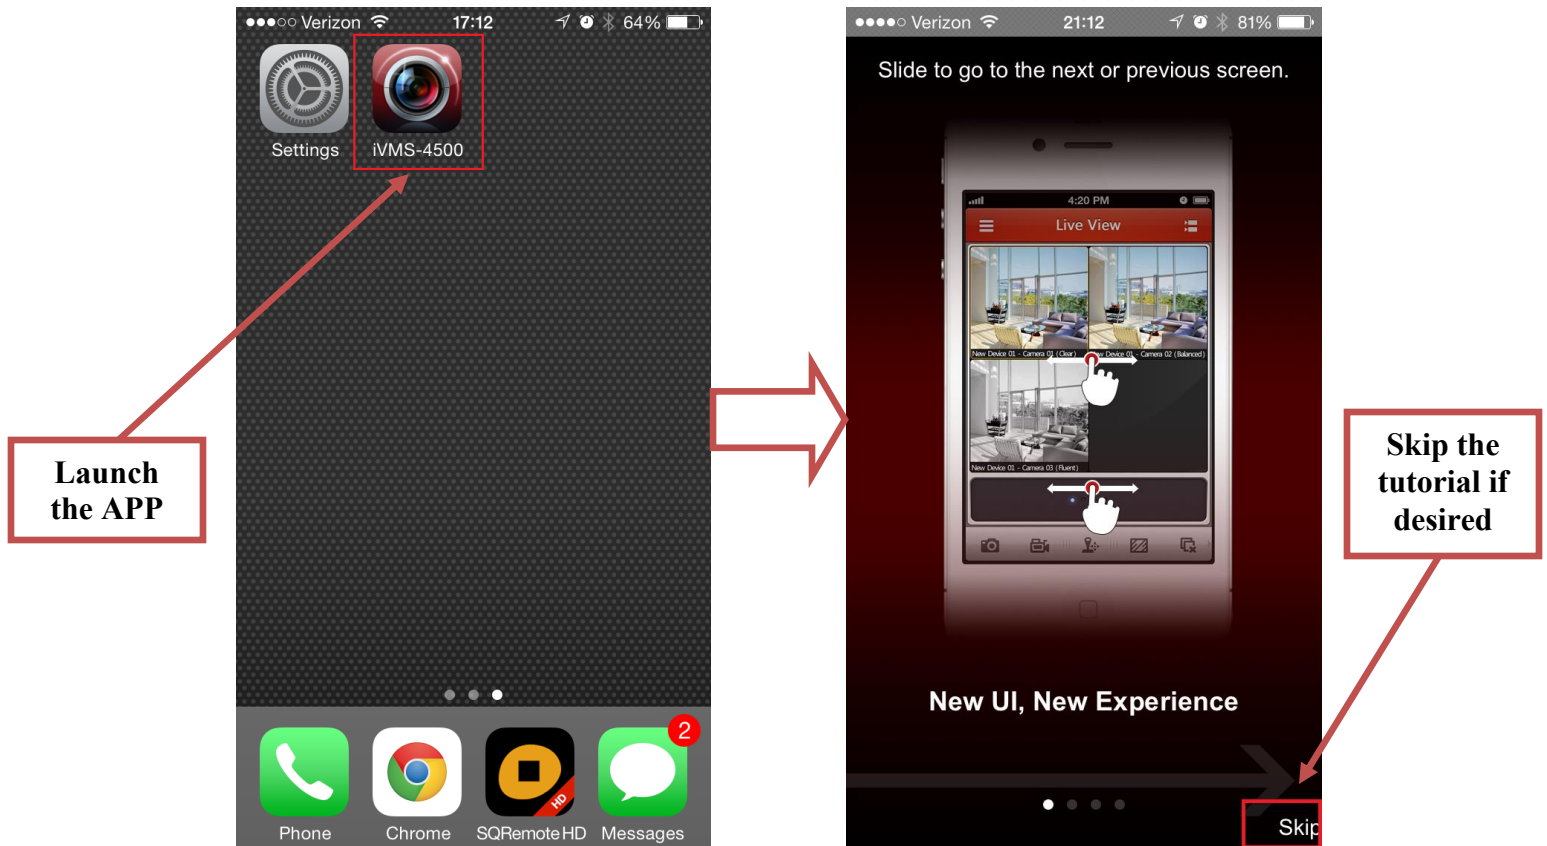

- **Please note:** If the upload speed is not sufficient, consider lowering the frame rate/bitrate/resolution for more fluent mobile app viewing.

## 8. CONFIGURING THE MOBILE APP

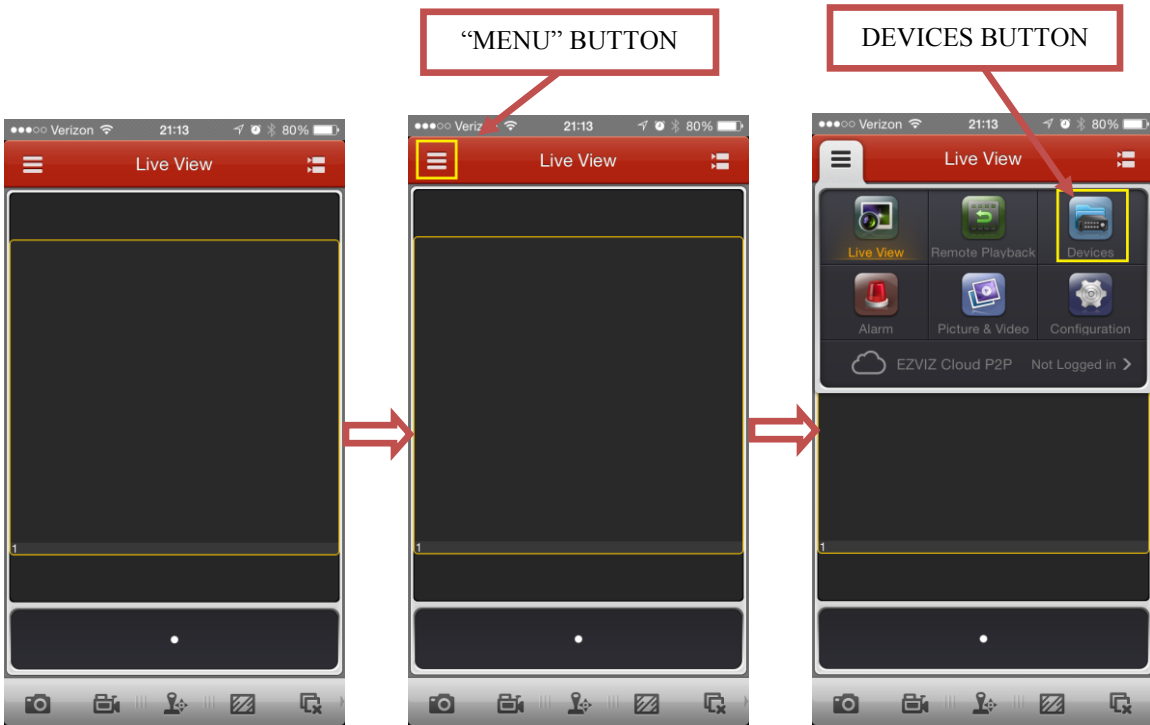

### CONFIGURING THE MOBILE APP

All Hikvision DVRs, NVRs and IP Cameras can be accessed with **iVMS-4500 application**. The APP can be downloaded from the **APP STORE (iPhone/iPad)**, **PLAYSTORE (Android)**. The app is also available for **WINDOWS MOBILE** devices (Nokia Phones and tablets).

Download the app from the appropriate place and launch it. When the APP is launched for the first time, a tutorial screen will be displayed, and it can be easily skipped.

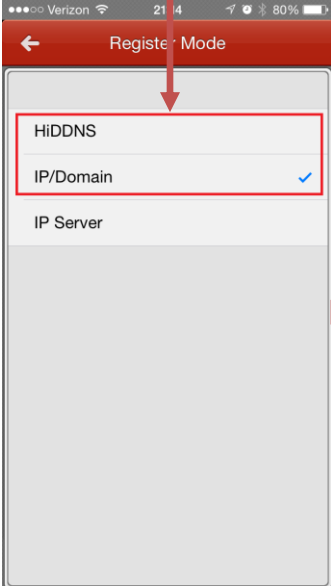

## CONFIGURING THE MOBILE APP

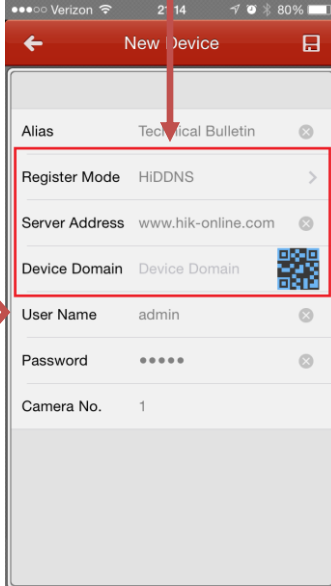

**Please Note:**  
If free Hikvision DDNS is configured for the device, change the “REGISTER MODE” to HiDDNS

## CONFIGURING THE MOBILE APP

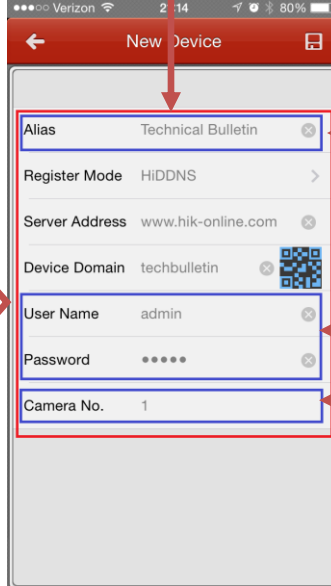

**CHANGE THE MODE**

**ENTER "DEVICE DOMAIN"**

**COMPLETE THE PAGE**

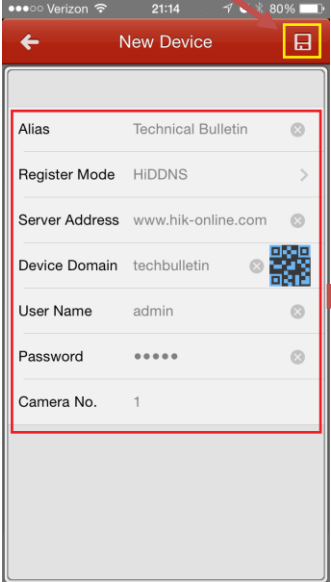

**Please Note:** Alias is just a friendly name for the address book (i.e. Home/Office)

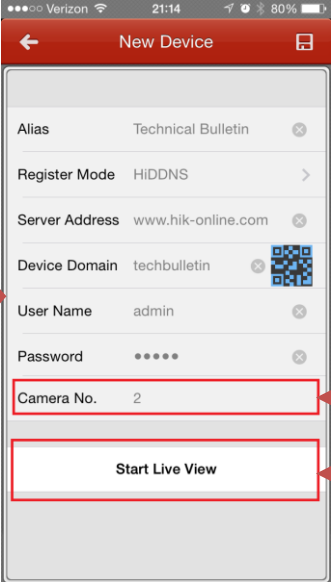

**User Name and Password** are the DVR's/NVR's username and password

**Please note:** The "CAMERA NUMBER" is set to 1. After saving the changes, the number will resemble the correct amount of cameras

**"SAVE" BUTTON**

**Please note:** The "CAMERA NUMBER" has changed to the correct number of cameras connected to the DVR/NVR

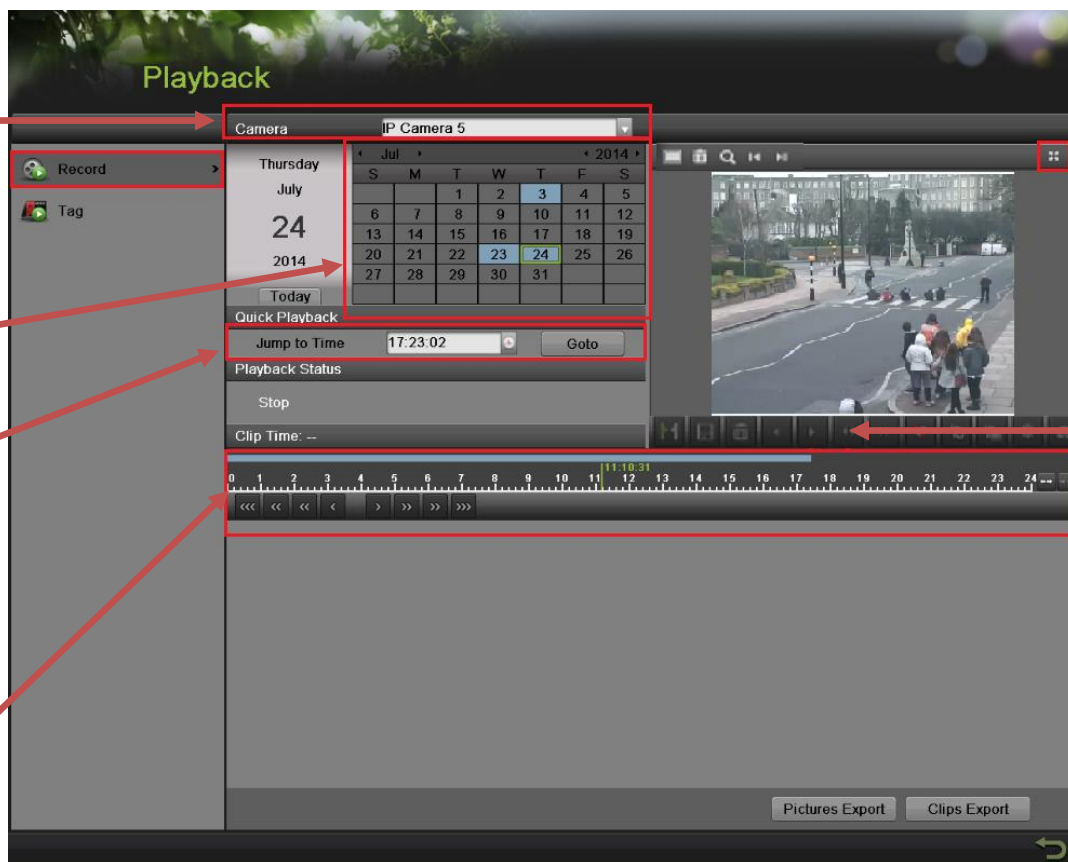

**Please note:** "START LIVE VIEW" button will begin live camera stream

## 9. PLAYING BACK RECORDED VIDEO

### PLAYING BACK RECORDED VIDEO

To initiate a **PLAYBACK**, go to “MENU”>”PLAYBACK”.

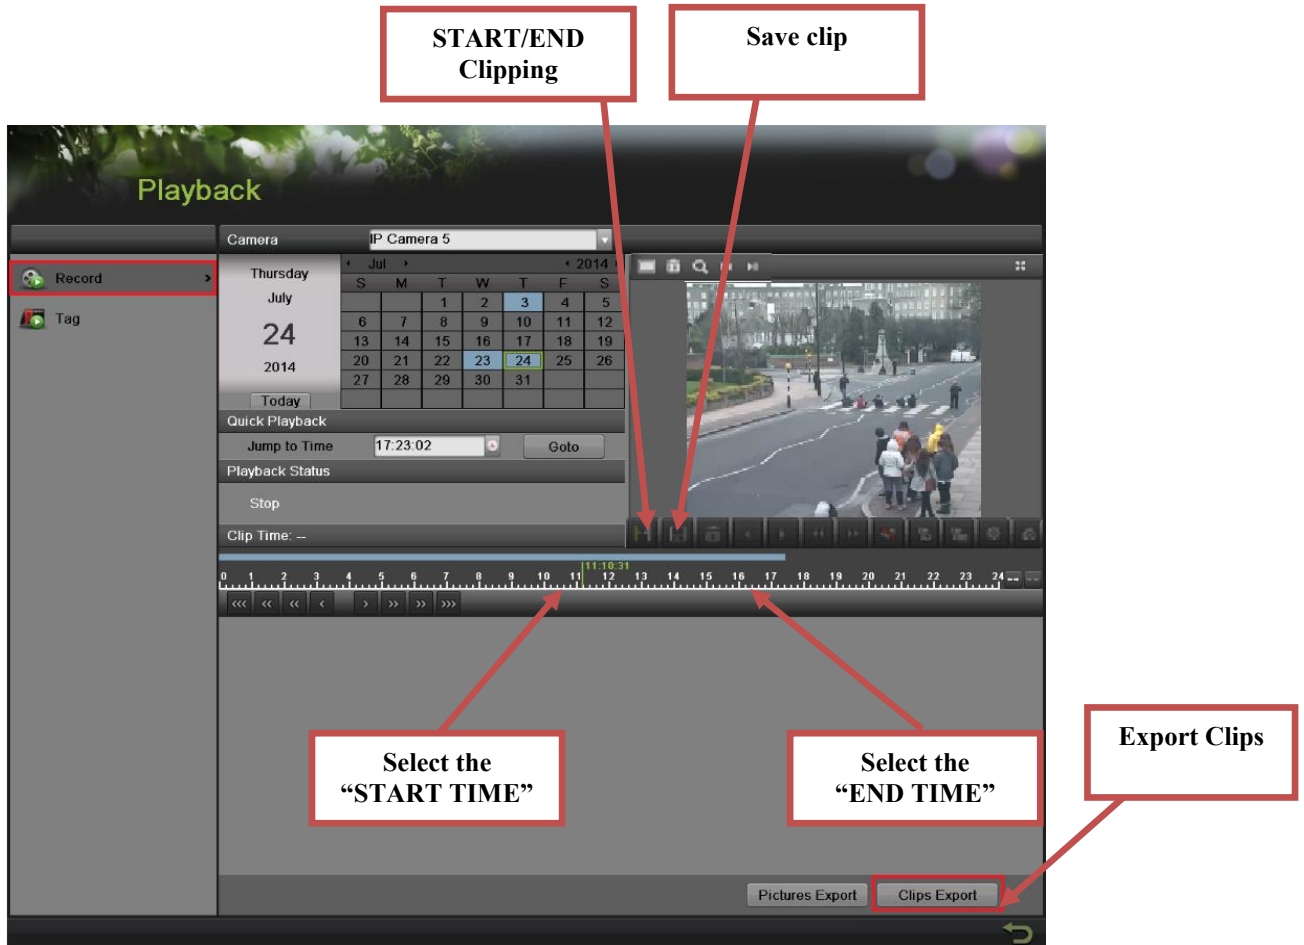

#### Steps to initiate **PLAYBACK**

1. Select the desired camera
2. Select the desired date. The days that contain recording will be highlighted on the calendar
3. Select the desired time using the Timeline or “Jump to Time” feature.
4. Press “PLAY”

## 10. MAKING A BACKUP

### PLAYING BACK RECORDED VIDEO

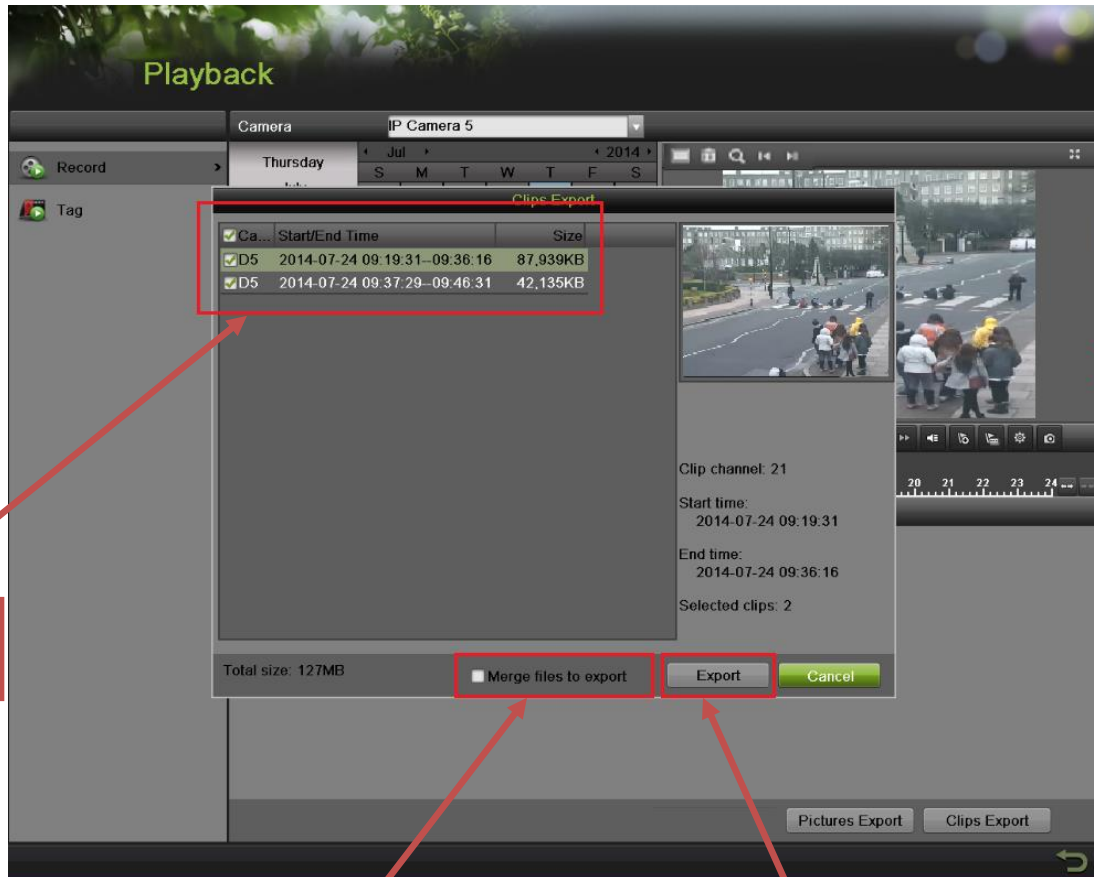

Steps to make a **BACKUP** of recorded video

1. Insert a USB FLASH Drive or a USB HDD into an available USB Port
2. Go to **"MENU">"PLAYBACK"**
3. Select the DATE and beginning time of the incident
4. Click **"START CLIPPING"**
5. Select the ending time of the incident
6. Click **"END CLIPPING"** (Same button as "Start Clipping")
7. Click **"SAVE CLIP"**
8. Repeat steps 1-7 as many times as required
9. Click **"CLIPS EXPORT"**

## PLAYING BACK RECORDED VIDEO

After pressing “CLIPS EXPORT” a new window opens up containing all saved clips.

Select the desired clips

If selected, multiple clips created from the same camera will be stitched together

EXPORT THE CLIPS TO USB DEVICE

10. Select the desired clips
11. Press “EXPORT”
12. After the backup is complete, simply remove the USB FLASH Drive or the USB HDD.
