Note: If the merchant's web site is hosted by an ISP, the host must allow the web site to run ASP or Perl/CGI applications.
WEB DESIGNER INFORMATION
Form Completed By:
The web designer should have a full understanding of how HTML is written including the ability to pass information between one or more web pages. Does the designer meet these requirements? <input type="checkbox"/> Yes <input type="checkbox"/> No
WEB SITE INFORMATION
The web designer should have a plan as to how the inventory of items offered will be tracked from the page. Does such plan exist? <input type="checkbox"/> Yes <input type="checkbox"/> No
Does the merchant's web site have the ability to automatically generate unique invoice/ticket numbers for transactions that occur on the site? <input type="checkbox"/> Yes <input type="checkbox"/> No
<b>***If the merchant is capable of all the above, please return this form as indicated. If not, please complete the remainder of this form. ***</b>
On a separate document, please provide the following information with regards to the inventory of all products/services to be offered: <ul style="list-style-type: none"><li>▪ Category Names</li><li>▪ Product Titles</li><li>▪ Brief Description of Product</li><li>▪ Dollar Amount</li><li>▪ Quantities</li><li>▪ Style/Color Variations</li><li>▪ Shipping Cost</li></ul>
Please provide the full file path of the cgi-bin where the server scripts are to reside. This is not the same as the URL. For example on a UNIX server, the path would look similar to "/home/mysite/mycgi-bin/". If the site runs on a NT server, the path would look more like "e:\wwwroot\mysite\cgi-bin\".

FirstPay.Net is proprietary software and has its own proprietary order entry system that is used to emulate a shopping cart environment. Third party shopping carts are not supported. First American Payment Systems will not be responsible for designing or implementing any custom code into the merchant's web site. First American is merely providing templates for the technical contact to use in developing a working environment compatible with the merchant's needs. The templates provided can be modified for this purpose. Any custom development required to implement the FirstPay.Net payment gateway into the merchant's site is the responsibility of the merchant at the merchant's cost.
